## 14f. Class B Deep Physics Validation (Top-1 DDS)

**Verdict:** MARGINAL **Pass rate:** 57.1% (16/28 principles validated, threshold 70%)

Combined score (surrogate pass-through + real physics): 16/28 principles scored PASSED (57.1%). Of these, only 7/28 principles ran independent deep computation (passed 6/7 = 85.7%); the rest re-used their Class-A surrogate score pending a future full-physics HPC run. Cite independent\_pct, not pct, as evidence of physics-based validation.
